1. A casket corner piece display, comprising:

a center piece having first and second ends with a casket corner piece receiving surface disposed therebetween, said center piece including a memorabilia receiving container disposed within said first end;

a base member attached to said second end of said center piece for supporting the casket corner piece display, said base member including an extended portion protruding transversely to said casket corner piece receiving surface of said center piece; and

a cover member removably disposed on said first end of said center piece to cover said memorabilia receiving container, said cover member including an extended portion protruding transversely to said casket corner piece receiving surface of said center piece such that the casket corner piece display has an approximate C-shaped profile;

wherein said casket corner piece receiving surface is adapted to receive and hold a casket corner piece so that the casket corner piece can be displayed for viewing.

2. The casket corner piece display of claim 1, further comprising a casket corner piece affixed to said casket corner piece receiving surface.

3. The casket corner piece display of claim 2, wherein said casket corner piece has personalized graphics emblazoned thereon.

4. A casket corner piece display, comprising:

a center piece having first and second ends with a casket corner piece receiving surface disposed therebetween, said center piece including a cremation urn disposed within said first end, said cremation urn adapted for holding cremation ashes therein;

a base member attached to said second end of said center piece for supporting the casket corner piece display, said base member including an extended portion protruding transversely to said casket corner piece receiving surface of said center piece; and

a cover member removably disposed on said first end of said center piece to sealingly engage said cremation urn, said cover member including an extended portion protruding transversely to said casket corner piece receiving surface of said center piece such that the casket corner piece display has an approximate C-shaped profile;

wherein said casket corner piece receiving surface is adapted to receive and hold a casket corner piece so that the casket corner piece can be displayed for viewing.

5. The casket corner piece display of claim 4, further comprising a casket corner piece affixed to said casket corner piece receiving surface.

6. The casket corner piece display of claim 5, wherein said casket corner piece has personalized graphics emblazoned thereon.

7. A casket corner piece display, comprising:

a center piece having first and second ends with a casket corner piece receiving surface disposed therebetween, said center piece including first and second chambers disposed within said first end;

a base member attached to said second end of said center piece for supporting the casket corner piece display, said base member including an extended portion protruding transversely to said casket corner piece receiving surface of said center piece; and

a cover member removably disposed on said first end of said center piece to cover said first and second chambers, said cover member including an extended portion protruding transversely to said casket corner piece receiving surface of said center piece such that the casket corner piece display has an approximate C-shaped profile;

wherein said casket corner piece receiving surface is adapted to receive and hold a casket corner piece so that the casket corner piece can be displayed for viewing.

8. The casket corner piece display of claim 7, wherein said first chamber is a memorabilia receiving container and said second chamber is a cremation remains container.

9. The casket corner piece display of claim 7, further comprising a casket corner piece affixed to said casket corner piece receiving surface.

10. The casket corner piece display of claim 9, wherein said casket corner piece has personalized graphics emblazoned thereon.

11. A method for memorializing a deceased who is to be buried in a casket, the steps comprising:

displaying a casket containing the deceased therein, said casket having at least one selectively removable personalized casket corner piece;

removing said personalized casket corner piece from said casket prior to inserting said casket into a grave site;

affixing said personalized casket corner piece to a casket corner piece display; and

presenting said casket corner piece display having the personalized casket corner piece to survivors of the deceased so that the deceased can be remembered by displaying the personalized casket corner piece.

12. The method of claim 11, further comprising the step of emblazoning said casket corner piece with personalized graphics that memorialize at least one particular aspect of the deceased's life.

13. The method of claim 11, wherein said casket corner piece display comprises:

a center piece having first and second ends with a casket corner piece receiving surface disposed therebetween, said center piece including a memorabilia receiving container disposed within said first end;

a base member attached to said second end of said center piece for supporting the casket corner piece display, said base member including an extended portion protruding transversely to said casket corner piece receiving surface of said center piece; and

a cover member removably disposed on said first end of said center piece to cover said memorabilia receiving container, said cover member including an extended portion protruding transversely to said casket corner piece receiving surface of said center piece such that the casket corner piece display has an approximate C-shaped profile.

14. The method of claim 13, further comprising the step of placing memorabilia related to the deceased in said memorabilia receiving container in said casket corner piece display.

15. A method for memorializing a deceased who is to be cremated, the steps comprising:

displaying a casket containing the deceased therein, said casket having at least one selectively removable personalized casket corner piece;

removing said personalized casket corner piece from said casket;

cremating the deceased;

collecting the remains of the cremated deceased;

affixing said personalized casket corner piece to a casket corner piece display having a cremation remains container therein;

depositing said remains of the cremated individual into said cremation remains container; and

presenting said casket corner piece display having the personalized casket corner piece mounted thereto and cremation remains therein to survivors of the deceased so that the deceased can be remembered by displaying the personalized casket corner piece.

16. The method of claim 15, further comprising the step of emblazoning said casket corner piece with personalized graphics that memorialize at least one particular aspect of the deceased's life.

17. The method of claim 11, wherein said casket corner piece display comprises:

a center piece having first and second ends with a casket corner piece receiving surface disposed therebetween, said center piece including said cremation remains container disposed within said first end, said cremation remains container adapted for holding cremation ashes therein;

a base member attached to said second end of said center piece for supporting the casket corner piece display, said base member including an extended portion protruding transversely to said casket corner piece receiving surface of said center piece; and

a cover member removably disposed on said first end of said center piece to sealingly engage said cremation urn, said cover member including an extended portion protruding transversely to said casket corner piece receiving surface of said center piece such that the casket corner piece display has an approximate C-shaped profile.

18. A method for merchandising selectively removable casket corner pieces, the steps comprising:

providing a plurality of casket corner piece displays;

affixing an individual casket corner piece to each of said plurality of casket corner piece displays; and

displaying said casket corner piece displays such that one of said casket corner pieces can be visually compared to said other casket corner pieces.

19. The method of claim 18, wherein said casket corner piece display comprises:

a center piece having first and second ends with a casket corner piece receiving surface disposed therebetween;

a base member attached to said second end of said center piece for supporting the casket corner piece display, said base member including an extended portion protruding transversely to said casket corner piece receiving surface of said center piece; and

a cover member removably disposed on said first end of said center piece, said cover member including an extended portion protruding transversely to said casket corner piece receiving surface of said center piece such that the casket corner piece display has an approximate C-shaped profile.

20. The method of claim 18, wherein each of the plurality of casket corner piece displays is fabricated of a wood from which is constructed a wood casket.

21. The method of claim 20 wherein the wood is selected from a group consisting of mahogany, cherry, walnut, maple and oak.

22. A casket corner piece display, comprising:

a center piece having first and second ends with a casket corner piece receiving surface disposed therebetween;

a base member attached to said second end of said center piece for supporting the casket corner piece display; and

a cover member removably disposed on said first end of said center piece;

wherein said casket corner piece receiving surface is adapted to have secured thereto a casket corner piece and to display the casket corner piece.

23. The casket corner piece display of claim 22 wherein said base member and cover member each include an extended portion protruding transversely to said casket corner piece receiving surface of said center piece such that the casket corner piece display is generally C-shaped in profile.

24. The casket corner piece display of claim 22 wherein said center piece, base member and cover member are semi-circular in cross-section.

25. The casket corner piece display of claim 22 further including a memorabilia compartment therein.

26. The casket corner piece display of claim 22 further including a cremation remains compartment therein.

27. The casket corner piece display of claim 22 further including a memorabilia compartment and a cremation remains compartment therein.
